

## **AWE plc uses One Touch Data's eFacility<sup>®</sup> to safeguard data for future generations**

AWE plc is using eFacility<sup>®</sup> ([www.efacility.co.uk](http://www.efacility.co.uk)), a web-based tool from One Touch Data, to assist it in analysing and managing its environmental data.

eFacility<sup>®</sup> is a modular, dynamic, web-based application, specifically designed for the management and presentation of spatial data, documents and maps from one or more facilities.

It offers the capability to amalgamate historical records with current and future environmental data and to combine on-line graphing, interactive GIS based maps, aerial photography, analysis, and reporting and document management. This allows the user to manage many different types of information with the added benefit of making data accessible to permitted users.

AWE plc has been using eFacility<sup>®</sup> for the past eight years to assist it in keeping comprehensive, centralised records and building a detailed picture of the environment. This in turn, has supported AWE plc in planning effectively for future developments of an environmental nature.

eFacility<sup>®</sup> is a tool which assists the user to make a holistic and systematic evaluation of data for future site development while providing instant access to relevant information with a complete chain of custody and audit trail.
